PROFESSIONAL SUMMARY

AI Systems & Full-Stack Engineer combining a founder-grade product mindset with deep architectural rigor - type-safe TypeScript, PostgreSQL/pgvector, multi-agent state machines, and hardened server-side AI infrastructure. Applies AI tooling to accelerate delivery without sacrificing security or architectural judgment. Proven self-sufficient remote execution and 100% client satisfaction across fractional and founding-engineer engagements.

TECHNICAL STACK

AI & Agentic: LangGraph, OpenAI (GPT-4o/5), Anthropic Claude Sonnet 4, LLM tool calling, RAG, pgvector, multi-agent and multi-provider orchestration
Backend: Node.js, Express, Python, REST APIs, PostgreSQL
Frontend: TypeScript, React 19, Next.js, Tailwind CSS, shadcn/ui
Infra: Vercel, Docker, GitHub, AWS S3, Stripe, hardened API proxies
Also used: MongoDB, Supabase, Drizzle, Socket.io, Framer Motion, Resend

PROFESSIONAL EXPERIENCE

Founding Engineer - AI Systems & Full-Stack | Prodigy Projects | Fractional / Contract Jun 2024 - Present

- Architectural Rigor: Shipped 10+ SaaS platforms, multi-agent AI hubs, client portals and analytics dashboards - type-safe, secure and scalable from day one.
- Founder Partnership: Translated business vision into stakeholder-ready products used to support pilot programmes, funding and revenue-generating products.
- Delivery Under Constraint: Designed and deployed complete applications in days/weeks, applying AI tooling without sacrificing architectural judgment or reliability.
- Client Trust: 100% client satisfaction across completed contracts - repeatedly praised for communication, speed and exceeding scope.

CLIENT WORK - LIVE PLATFORMS

Mindset Mentor AI - Scott Oldford mindsetmentorai.com
Live AI mentor for 7- and 8-figure entrepreneurs with identity-level pattern recognition, realtime voice conversations, session snapshots and Stripe billing. Stack: React, Node.js, OpenAI, Stripe.

Online Business Accelerator - Scott Oldford onlinebusinessaccelerator.com
12-month accelerator platform with AI Scaling Agents, training and session management serving thousands of users. Stack: React, Node.js, PostgreSQL.

Online Business Scaling Suite - Scott Oldford onlinebusinessscalingsuite.com
Members-only operational portal behind Scott Oldford's programmes with protected content, secure sessions and production member workflows. Stack: React, Node.js, PostgreSQL.

FEATURED PRODUCT BUILD

AgentOps - Multi-Agent Enterprise Operations Command Center agentops.digitalprodigy.dev
Live operations cockpit routing enterprise requests through a coordinated 8-node AI agent crew with human approval and forensic audit. Built a deterministic state machine (Triage -> Memory -> Legal -> Finance -> Comms -> Synthesis -> Approval -> Finalize), pgvector semantic memory, typed outputs, confidence scoring, replayable audit records and evaluation/observability. Stack: React, TypeScript, Node.js, Express, Python/FastAPI, PostgreSQL, pgvector, LangGraph.

ADDITIONAL PRODUCT BUILDS

- NEXUS AI Assets - White-Label Client Portal & Delivery OS

nexus-ai.digitalprodigy.dev

Client operations platform combining onboarding, sprint roadmaps, milestone payments, realtime Socket.io messaging, S3 asset delivery and a GPT-4o assistant grounded in live project state. Stack: React, TypeScript, Node.js, Express, MongoDB, OpenAI, Resend, Stripe.
- Flow Analytics - Multi-Tenant SaaS Analytics

flow-analytics.digitalprodigy.dev

Analytics SaaS with revenue/conversion reporting, server-side Claude proxy, payload and token controls, Supabase/PostgreSQL, subscription feature gating and Stripe billing. Stack: React 19, TypeScript, Express, Claude Sonnet 4, Supabase, AWS S3.
- Aurixa - AI-Powered Luxury Real Estate Platform

aurixa.digitalprodigy.dev

Commissioned client platform with React frontend, Strapi/PostgreSQL backend, Restb.ai computer vision, OpenAI listing enrichment, Cloudinary media and n8n/CRM inquiry handoff. Stack: React, TypeScript, Strapi 5, PostgreSQL, Restb.ai, OpenAI, Cloudinary, n8n.
- MUAEVE - Luxury Portfolio & Booking Platform

muaeve.digitalprodigy.dev

Custom portfolio and booking platform for a professional bridal hair and makeup artist with inquiry management, Resend email automation and private admin dashboard. Stack: React, TypeScript, Node.js, PostgreSQL, Drizzle, Resend.
- Grovmade OS - Sports Infrastructure Platform

grovmade-os.digitalprodigy.dev

Verified sports data layer connecting schools, teams, athletes and scouts - built as a client MVP for stakeholder and investor presentations across five sports. Stack: React, TypeScript, Node.js, Express, PostgreSQL.
- RPM Logic - Automotive Performance Platform

rpmtuninglogic.digitalprodigy.dev

Full-stack platform for a professional automotive tuning shop, delivered in under 24 hours, with an AI chatbot grounded in the shop's knowledge base for pricing, power estimates and remote tuning setup. Stack: React 19, TypeScript, Node.js, Express, OpenAI, Resend.

KEY ACHIEVEMENTS

- Scale: 22,300+ lines of type-safe TypeScript in a single SaaS build; 60+ components across 22 routed pages.
- AI Architecture: 8-node multi-agent system with pgvector semantic memory, synthesis aggregation and human-in-the-loop approval gates.
- Delivery Speed: Full-stack platform designed, built and deployed in under 24 hours from first brief.
- Client Platforms: Three live platforms for Scott Oldford serving thousands of paying users.
- Client Rating: 5.0 / 5.0 across completed contracts - consistently praised for communication, speed and exceeding scope.

TECHNICAL LEADERSHIP & STRATEGIC IMPACT

- Product Partnership: Bridges founder vision and technical execution, delivering stakeholder-ready MVPs and production systems that support funding, pilots and revenue.
- Architectural Ownership: Full-lifecycle ownership of multi-tenant SaaS, agentic AI hubs, secure data systems, APIs, integrations, product UI and deployment.
- Production AI Judgment: Designs observable, testable AI systems with retrieval, typed contracts, fallbacks, evaluation, telemetry and human approval rather than opaque prompt chains.
- Remote Execution: Works independently across distributed teams, communicating directly with founders and stakeholders while maintaining delivery momentum.
